Counting Numbers 1-20 Lesson

Great for ESL and EFL Learners!

Our 1-20 Number Lesson is a great addition to our popular numbers song "Counting from 1-20". This lesson can be used as an introductory video before showing the numbers song.

First start by counting 1-20 and once that is mastered try counting backwards from 20-1. This mimics the lesson in the video and should reinforce learning numbers.

Learning numbers is fun with manipulatives. Try pom poms, beads, buttons, anything really. Put one down each time you count. At the end notice how big your pile got! Next, take one away while counting backwards.
